LEMINE MBARECK

Full-Stack Developer | TypeScript · React · Next.js · Node.js · MongoDB · SQL · Python
Fayetteville, AR | (479) 387-8109 | mlemine.mbareck@gmail.com
linkedin.com/in/lemine-mbareck | github.com/Mbareck21 | portfolio-drab-nine-66.vercel.app

PROFESSIONAL SUMMARY

Full-stack developer who builds complete web apps: React and Next.js front ends, typed APIs, MongoDB and SQL data layers, Stripe payments, auth, and automated tests. Recent work includes a live freight marketplace (cdfreight.com) and an adaptive learning app with AI-generated reading passages. Currently a data engineer at Walton Arts Center, building Python and SQL pipelines into Snowflake. Spent the five years before that leading immigration legal programs and teams, and built the web app that replaced the program's spreadsheet case tracking. Uses AI coding tools daily and checks their output before it ships.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, R

Front end: React 19, Next.js (App Router), Vite, TanStack Query, Tailwind CSS, shadcn/ui, Material UI, PWAs (service workers, IndexedDB)

Back end and data: Node.js, REST APIs, Next.js route handlers, Vercel Functions, Zod, MongoDB and Mongoose, Snowflake, SQL Server, PostgreSQL, ETL pipelines, Power BI

Integrations: Stripe Connect, Leaflet maps, web push, OpenAI and Groq APIs

Version control and deployment: Git and GitHub pull requests, GitHub Actions, Vercel

Spoken languages: English, Arabic, French

SELECTED PROJECTS

CD Freight, relay freight marketplace (Next.js 16, React 19, TypeScript, MongoDB, Stripe Connect) cdfreight.com

- Built and launched a marketplace where shippers post loads and carriers book them. Long hauls split into relay legs at hubs, and a tour planner chains legs so drivers finish the day at home.
- Built separate portals for drivers, dispatchers, shippers, and admins, with JWT session auth, Stripe Connect payments, Leaflet maps, PDF documents, and web push notifications.
- Wrote automated tests for the domain rules (relay splits, payouts, hours of service, net pay) and end-to-end tests for public, driver, shipper, payment, messaging, and mobile flows.

Quest, adaptive learning PWA (Next.js 16, TypeScript, MongoDB, Groq) edu-app-beta-eight.vercel.app

- Built a grade 4 practice app for words, reading, and math that my son uses every day. It has spaced repetition, adaptive math difficulty, and AI-generated reading passages. Progress syncs to the server, and failed saves wait on the device.

TrendSpark, AI content pipeline (Next.js, TypeScript, OpenAI, Groq) trendspark.vercel.app

- Built a five-stage pipeline (trend discovery, article extraction, ideas, scripts, audio) that chains several LLM APIs.

PROFESSIONAL EXPERIENCE

Junior Data Engineer | Walton Arts Center & Walmart AMP, Fayetteville, AR **02/2026 – Present**

- Build Python and SQL pipelines that load Tessitura, Ticketmaster, Blackbaud, and Shift4 data into a Snowflake warehouse, giving departments one source of truth for reporting.
- Run validation checks and root cause analysis across Snowflake, SQL Server, and PostgreSQL. Schedule batch jobs and watch pipeline health so problems are fixed before they reach reports.
- Deliver P&L dashboards and operational reports in Power BI with finance and business teams. Cut report development time by about 80% with AI-assisted workflows.
- Document data flows and pipeline logic. Trained 30+ department heads and senior leaders on Power BI.

Administrative Supervisor, Immigration Legal Services | International Rescue Committee, Atlanta, GA **10/2025 – 02/2026**

- Led a 9-person legal team in one of IRC's largest U.S. offices, which serves 5,000+ clients a year across programs.
- Owned monthly KPI tracking and audits for federal (ORR) and grant reporting, and coached staff through feedback and training.

Immigration Program Manager (promoted from Case Manager) | Canopy NWA, Fayetteville, AR **01/2021 – 10/2025**

- Built the program's case management tool, first in Excel and then as a Next.js and MongoDB web app with login, search, and filtering that replaced spreadsheet tracking.
- Built and ran the immigration legal services program for 1,000+ clients, with a near-perfect approval rate on hundreds of federal applications. Received the 2024 Arkansas Access to Justice Award for the program's work.

- Analyzed 1,000+ case records to find bottlenecks that shaped staffing decisions. Standardized reporting templates and cut reporting time by 20%.
- Trained 25+ interns, staff, and volunteers. Earned U.S. Department of Justice accreditation in 2022.

Language Services Contractor | CyraCom International **2019 – 2020**
Legal and medical interpretation and translation in Arabic, English, and French.

Assistant Press Attaché | Presidential Cabinet, Nouakchott, Mauritania **2011 – 2018**

EDUCATION

Foundations of Generative AI Nanodegree | Udacity **2025**
Hands-on projects with large language models, retrieval-augmented generation (RAG), PyTorch, and LangChain.

Full-Stack Web Development Bootcamp | Code the Dream **03/2022 – 12/2022**
Built a web development portfolio with HTML, CSS, JavaScript, React, Node.js and Express, MongoDB, and Airtable, using Git and GitHub throughout.

M.A., Media Studies | University of Arkansas, Fayetteville, AR **05/2019**
Fulbright Scholar. Thesis: computational sentiment analysis of political speech and news coverage (R, NLP).

B.A., Journalism | University of Manouba, Tunisia **06/2011**

CERTIFICATIONS

Google Data Analytics Professional Certificate (2023) · U.S. Department of Justice Accredited Representative (2022 to present)
